--	---

Description

The biconical-shaped vessel with the sharp edge placed in the middle of the height. The shoulders are sloping, the neck is bent, the rims have a rounded cut and are bent outwards. The lower half is conical, the walls are slightly concave. The bottom is clearly defined, narrow, flat. The outer surface is covered with yellow-hot liquid engobe and painted with dark brown paint. The composition is linear and consists of three sashing bands: on the rims, on the shoulders, under the rib.

Basic data
